OVERVIEW

A disciplined & hardworking senior developer & teamlead who has been making games in Unity for a decade. Specializes in tool creation, collaboration, technical writing and 2D & mobile development.

EXPERIENCE

Beach Bum, a Voodoo company — *Team Lead & Unity Architect*

2021 - PRESENT

- Developed several features and systems for all of the company's games, generating thousands of dollars in revenue.
- Created a robust shared code and features framework, adopted across all game studios (10+) in the company, shortening development cycles from months to weeks.
- Leading development team of said framework, which involves:
 - Managing multiple developers and mentoring them to improve their programming abilities.
 - Collaborating with stakeholders and game teams.
 - Designing complex features to be reusable across vastly different codebases.
- Previously led the development team of Hexacoin, a mobile puzzle game.
 - Managed 2 separate development teams across 2 different timezones while operating from a 3rd timezone.

EmmetGames — *Indie Development*

2015 - PRESENT

- Created & released multiple small-scale games spanning various platforms and genres.
- Operating a one-man studio where I take care of all technical aspects including build workflows, SDK integration and release management

Amdocs — *Software Developer*

2019 - 2020

- Developed internal infrastructure tools for microservices development.
- Created scalable pipelines in Jenkins by leveraging containerized tools.
